Dear Parent/ carer

Keeping children and families safe online.

We would like to bring to your attention that even the youngest children can be at risk when using the internet and therefore would request that you read the following information and access the website where you can get some good tips.

<http://www.123ict.co.uk/meet-smartie-the-penguin-eyfs-e-safety-resources/>

Our aim is to keep our children and families safe when using the internet right from the start.

Keep Your Kids Safe On The Internet

Keep the computer out of your child's bedroom or any other unsupervised area.

Do not install a web-cam. It is dangerous to put images on the internet.

Set household rules regarding online activities and safety guidelines.

Utilize parental controls provided by your service provider or blocking software.

Instruct your child never to arrange a face to face meeting with someone they met online.

Find out what computer safeguards are utilized by your child's school and at the homes of their friends.

Check your computer's internet history frequently.

Talk to your child about sexual victimization and potential online dangers.
